

Individual Assignment II: Oracle Pluggable Databases (PDB) Management

Course Information

Field	Details
Course	Database Development with PL/SQL (INSY 8311)
Instructor	Eric Maniraguha
Email	eric.maniraguha@auca.ac.rw
Teaching Assistant	Afanyu Emmanuel
Assignment Date	September 17, 2026
Applicable Groups	A, B, C, D
Deadline	Monday, September 22, 2026, 11:59 PM (STRICT)
Weight	5 Raw Points (Practical Assessment)
Submission Method	Google Form Only

Critical Warnings

Rule	Consequence
Late submission	ZERO MARKS — no extensions, no excuses
Submitting by email	Not accepted — form submissions only
Private GitHub repository	ZERO MARKS
Copying from classmates	ZERO MARKS
Using ChatGPT/AI tools for commands or solutions	ZERO MARKS
Naming conventions not followed exactly	Grade penalty / risk of zero

Assignment Objective

By completing this assignment, you will demonstrate practical understanding of:

- Oracle **Multitenant Architecture**
 - Creation and deletion of **Pluggable Databases (PDBs)**
 - **User creation and management** inside a PDB
 - Usage of **Oracle Enterprise Manager (OEM)**
 - Professional **technical documentation** using GitHub
-

✓ How to Maximize Your Grade

1. Follow all naming conventions **exactly** (no variations)
2. Perform all tasks **individually**
3. Provide **clear, readable screenshots** as evidence
4. Document your work **professionally on GitHub**
5. Submit **before the deadline**

🔒 Academic Integrity Guidelines

- Individual work only — no collaboration
- No copying commands, screenshots, or repositories from classmates
- No use of ChatGPT or AI tools to generate commands/solutions
- No reused screenshots, shared repos, or impersonation
- All work must reflect **your own execution and documentation**

🔧 Assignment Structure Overview

#	Task	Type
1	Create a New Pluggable Database	Technical
2	Create and Delete a PDB	Technical
3	Oracle Enterprise Manager (OEM) Setup	Technical
4	Documentation & Reporting	Documentation

All four tasks are **mandatory**.

Task 1: Create a New Pluggable Database

Naming Conventions (Exact Match Required)

Item	Format	Example
PDB Name	FirstTwoLettersOfFirstName_pdb_StudentID	er_pdb_2024101
Username inside PDB	FirstName_plsqlauca_StudentID	eric_plsqlauca_2024101
Password	Simple, self-chosen — must remember it	—

Requirements

- ☐ PDB created successfully
- ☐ User created **inside** the PDB
- ☐ This user account will be reused for all future class work

Evidence Required (Screenshots)

- ☐ PDB creation command
- ☐ PDB open state
- ☐ User created inside PDB (**username clearly visible**)

Task 2: Create and Delete a PDB

Naming Convention

Item	Format	Example
Temporary PDB Name	<code>FirstTwoLettersOfFirstName_to_delete_pdb_StudentID</code>	<code>er_to_delete_pdb_2024101</code>

Requirements

- ☐ Create the PDB successfully
- ☐ Verify that it exists
- ☐ Delete the PDB completely
- ☐ Confirm that it no longer exists

Evidence Required (Screenshots)

- ☐ PDB creation (command + result visible)
- ☐ PDB deletion (command + result visible)

Task 3: Oracle Enterprise Manager (OEM)

Requirements

- ☐ OEM is accessible
- ☐ Dashboard reflects your Oracle environment
- ☐ Dashboard reflects completed PDB tasks
- ☐ **Username visible** on dashboard

Evidence Required (Screenshots)

- ☐ Clear screenshot of the OEM dashboard

Task 4: Documentation & Reporting

Prepare a short, professional report and publish it on GitHub.

GitHub Repository Setup

Item	Requirement
Repository Name	<code>oracle_pdb_ass_II_[studentId]_[firstname]</code>

Item	Requirement
Visibility	Public (mandatory)

Required Repository Structure

```
oracle_pdb_ass_II_[studentId]_[firstname]/
├── README.md
├── screenshots/
│   ├── pdb_creation/
│   ├── pdb_deletion/
│   └── oem_dashboard/
```

README.md Must Include

- ☐ Overview of tasks
- ☐ Oracle environment used
- ☐ Explanation of each task
- ☐ Challenges faced (if any) and how they were solved
- ☐ Integrity statement
- ☐ Submission details block (see below)

Required Submission Details Block (in README + Google Form)

```
Repository Link: [GitHub URL]
PDB Name Created: [PDB Name]
Issues Encountered: [Yes/No]
```

Submission Instructions

1. Complete all four tasks
2. Push all evidence and documentation to your **public** GitHub repository
3. Fill in the submission details block in your README
4. Submit the same details via the **Google Form** (link above)
5. **✗** Do **not** email your submission — it will be ignored

Final Checklist Before Submission

- ☐ Correct PDB names used (exact format)
- ☐ User created inside the PDB
- ☐ Temporary PDB created and deleted
- ☐ OEM dashboard screenshot included

- ☐ GitHub repository is **public**
 - ☐ README is clear, complete, and professional
 - ☐ Screenshots are legible and correctly labeled
 - ☐ Submission details block filled in (README + Form)
 - ☐ Submitted via Google Form before the deadline
-

Professional & Ethical Note

"Excellence is never an accident; it is the result of discipline, commitment, and integrity."

As future database professionals, **precision, discipline, and integrity** are non-negotiable.
